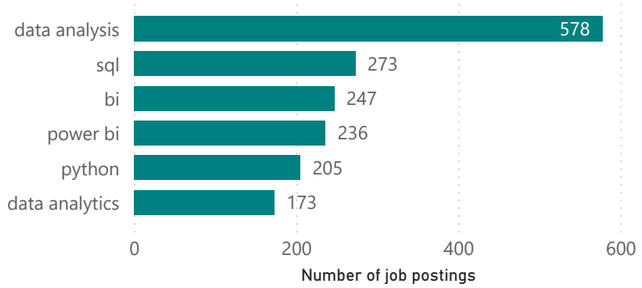
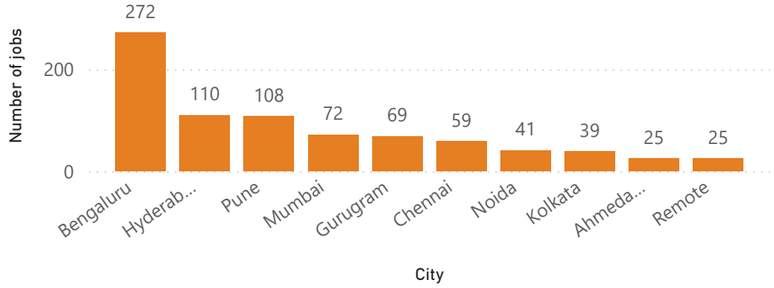
Data Analyst Job Market India — 2026

Top 15 Skills Demanded by Employers



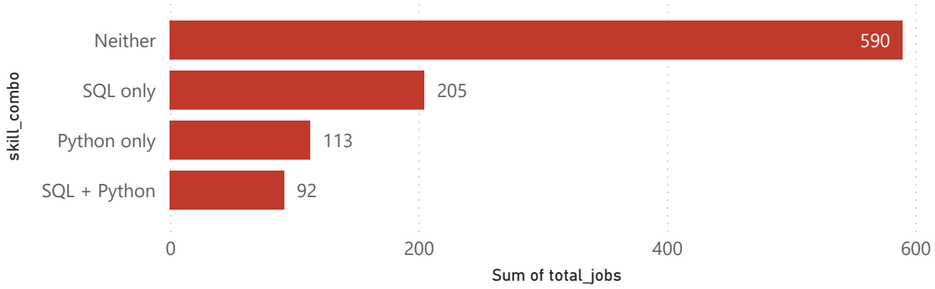
Power BI (31.5%) is more demanded than Tableau (7%) in India — a 4x gap. Machine Learning appears in only 7.5% of analyst roles.

Data Analyst Jobs by city



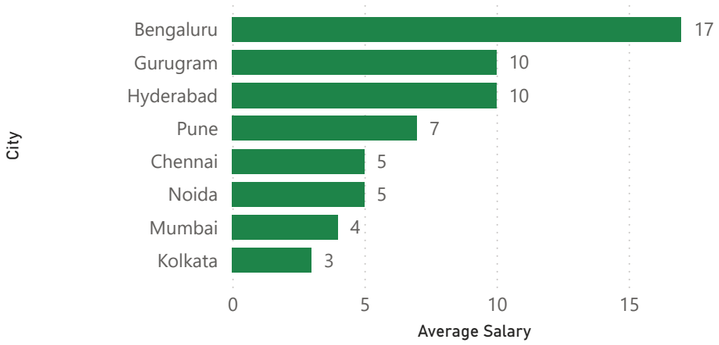
Bengaluru alone accounts for 26% of all openings. Top 3 cities cover nearly 50% of the entire market.

SQL vs Python vs Both — Job Distribution



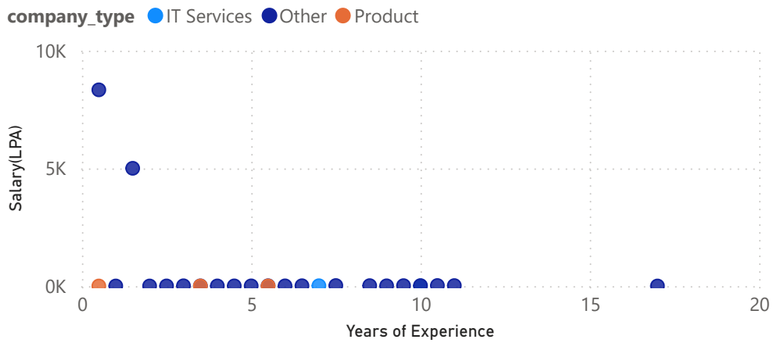
590 jobs require neither SQL nor Python — relying on Excel and Power BI alone. SQL + Python together appear in 92 postings, signaling demand for analysts who can do both.

Average salary by city



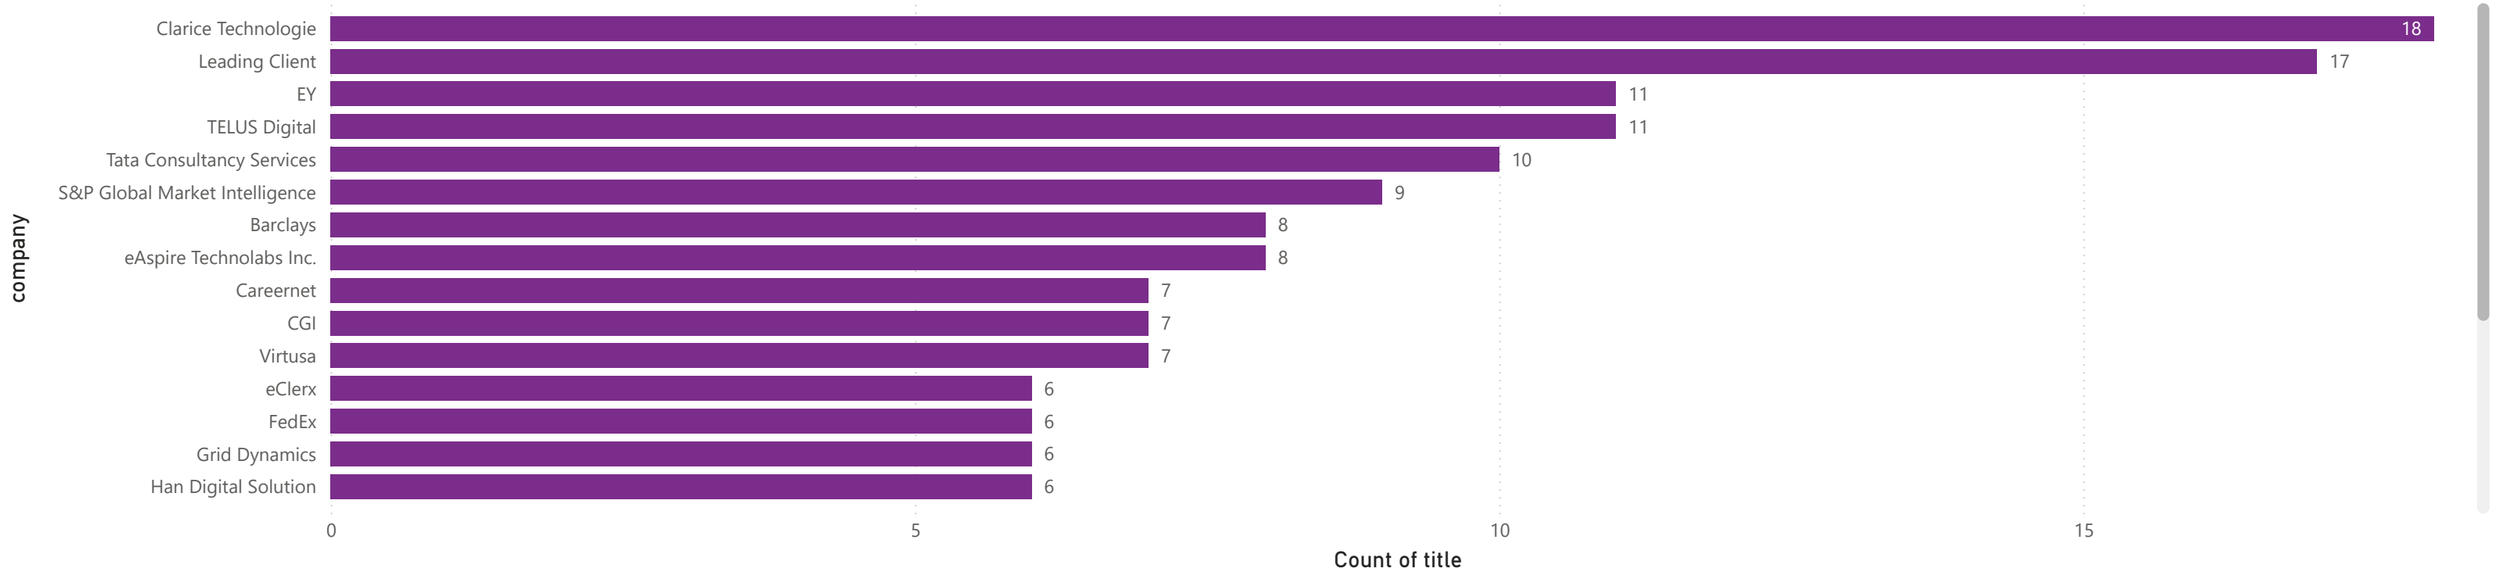
Only 10.6% of postings disclosed salary. Among those, Bengaluru leads at 17 LPA average.

Experience vs Salary



Mid-level roles (2-5 years) dominate the market. Product companies pay more than IT services at every experience level.

Top 20 Hiring Companies



Staffing and consulting firms dominate hiring — Clarice Technologies and Leading Client post more jobs than any product company. Big IT firms like TCS appear but rank lower, suggesting most analyst demand comes from mid-size firms.
